## NEW HARDY YELLOW ROSE.

**Soleil d'Or.** The goal for which many of the world's greatest rose hybridizers have been striving has at last been reached and we have a double flowered yellow rose, hardy enough to withstand the winters of our northern states. Soleil d'Or is the result of a cross between Persian Yellow and Antoine Ducher, retaining many of the characteristics of the Persian Yellow, the bark being much the same and foliage resembling that of its parent, but produced more plentifully, while in growth it is more branching and more vigorous. The flower is perfection in form with conical buds, expanding into a large and full globular flower, with incurved inner petals. The buds are a marvelous shade of rich chrome yellow with just a tinting of coppery rose in the center. Strong two year old plants, only size we have, each, 50c.: 6 for \$2.50, by express.

## RAMBLER ROSES

**The Crimson Rambler.** Extra selected three-year-old plants, each 50 cts., by express. Very strong two-year-old plants, by mail 30 cts., by express 25 cts. each.

We consider this the most wonderful of all the new roses. We have had this summer branches seven feet long, loaded down with large clusters of these brilliant red roses. One would hardly believe it possible that so many could be produced on one shoot. A superb

*Roses continued.*

climber, cannot be excelled, while it is also magnificent in bush form. One of the striking characteristics of this rose is its remarkable color, which is of the brightest crimson, and remains so to the end. The flowers with which the plant is covered are produced in large trusses of pyramidal form and carrying thirty to forty flowers, which remain on the plant a long time. The foliage is bright green and glossy and contrasts finely with the bright crimson of the rose. The plant seems to be as hardy as the old *Prairie Queen*. Every garden should contain this grand rose.

**The Most Popular of all Hardy Climbing Roses.**

**Pink Rambler.** Resembles *Crimson Rambler* in every respect but color, which in this is clear pink. One of the most attractive of the set. The mature flowers often change to creamy white when fully matured; strong two-year-old plants, 35c. each.

**WHITE RAMBLER.** A worthy companion plant for *Crimson Rambler*. It is similar in habit of growth and form of flowers, perfectly hardy, and flowers in good sized clusters. The pearly white flowers contrast nicely with those of *Crimson Rambler*, and make a beautiful display when planted with it. Its flowers are quite fragrant and last for a long time after being cut, 10c. each. Strong two-year-old plants, 35c.

**TREE OR STANDARD CRIMSON RAMBLERS.** The Tree Roses are grafted on hardy rose stalks 4 to 5 feet high; are tree-shaped, and when in full bloom are objects of beauty, making handsome plants for

the lawn or rose border. Fine strong trees that will bloom nicely the first year, \$1.00 each. \$9.00 per dozen. These can only be sent by express or freight.

**TREE ROSE.**

## NASTURTIIUMS.

Were we asked to name the three most popular flowers that are grown from seed, we should answer unhesitatingly. NASTURTIIUMS, PANSIES, and SWEET PEAS. Few flowers impart such rich "bits of beauty" to the garden as the different types of NASTURTIIUMS. In addition to their use in the garden and on trellis, we would recommend planting the seed freely along fences, hedges, and walks, or wherever it is desired to have bright colors. *You cannot have too many Nasturtiums!*

## PANSY.

We call attention to our SPECIAL STRAIN OF PANSIES. This strain embraces not only the enormous blooms of the most perfect shapes peculiar to the new Giant Types, but also the richest, rarest and most varied colors found in the FANCY STRAINS. We have taken special pains in making up this unrivalled mixture, and we do not believe a better strain can be produced in this or in any other country.

## PETUNIA

We have long been celebrated for our magnificent strains of both single and double varieties, which we endeavor to improve each year by careful selection. We have tested samples received from the leading Petunia specialists, and can safely say that *our own strain is the best that can be produced from any source.*

SINGLE PETUNIA.

| Extra fine mixed.....                   | 10 .. |
| Hybrida fine mixed.....                 | 5 ..  |

NOTE.—It is well known that the seed saved from carefully hybridized flowers produces but a small percentage of double flowers, the balance being single of an unusually fine quality. The weaker seedlings should be carefully saved, as these invariably produce the finest double flowers.

## The Fragrant, Favorite Flower

Many people now believe that their failure to grow good Sweet Peas of late years is due to the fact that the seed has been produced in a hot dry climate, similar to California. Our customers who have used the English-grown seed declare that it is far superior to anything else they have tried, as the cool, moist climate

of England is favorable to the production of the very best quality of Sweet Peas, while the tendency of stock grown in California is to run to seed too quickly. We are this year offering the genuine English-grown seed, and can highly recommend a trial.

# CEMETERY WORK

INCLUDING PLANTING, WATERING AND  
CARE OF FLOWERS.

For the past three years we have been making a specialty of this work, and are quite satisfied that no beds looked better, or received more careful attention, than those in our charge. We anticipate a large trade the coming season, and have made preparations to meet it promptly. Those who are kind enough to favor us with their patronage in this line should place their order as early as possible, so that all preparatory work can be done as soon as the ground is free from frost, thus saving much valuable time. Beds prepared early in the season retain the moisture much longer, and are in far better condition than those prepared later when the ground is dry and overgrown with weeds.

We supply all kinds of Bedding Plants : **Flowering Shrubs, Roses, Hanging Baskets, Rustic Seats, Vases, and Bulbs for Fall planting.** Pansies may be planted as soon as frost is out of the ground.

We have facilities for placing fresh **Cut Flowers** regularly on plots, when so desired.

## Window Boxes, Vases and Hanging Baskets

We grow a great many plants suitable for filling above, including all the favorite varieties generally used for this purpose. Prices vary according to size and quality, etc.

## Cut Flowers and Floral Designs

Our continued success at the various Exhibitions, and the many large orders satisfactorily filled, will testify to our ability and taste in making up Designs and arranging Cut Flowers. We are in a better position than ever before to fill all orders for

FLORAL TRIBUTES, ETC.**
